

INVITATION ONLINE CLOSING CONFERENCE 24 MARCH 2021

**SUPER CIRCULAR ESTATE: the first circular social housing estate
for 100% material and social circularity**

**CROSS
BOUND
ARIES**

Join us and learn more about circular development. Learn more about developing a circular estate based on the best practises in the first circular housing estate. The Super Circular Estate project partners are looking forward to sharing their knowledge, experiences and lessons.

In 2017, the Super Circular Estate project in the city of Kerkrade was granted a subsidy by the Urban Innovative Actions initiative. The aim of the project was to experiment with new circular economy processes aimed at 100% reusing and recycling of materials acquired from the demolition of an outdated social housing high-rise estate.

After years of innovating, experimenting and finally implementing circularity in the construction of a new housing estate, we are now approaching the realization of the Super Circular Estate.

The Super Circular Estate program, which is part of the Crossing Boundaries 2021 program, consists of several components. In the plenary part you can hear everything about the entire Super Circular Estate project through an overall presentation about the circular area development. In specific sub-sessions you can learn more about circular construction, social circularity and the policy recommendations. Several keynote presentations will be given by:

- Diederik Samsom
- Aristide Athanasiadis
- Marwa Debaieh

Diederik Samsom

We are happy to announce that Diederik Samsom, Head of Cabinet of Executive Vice-President Frans Timmermans at the European Commission, accepted the invitation to be one of the plenary speakers at the Crossing Boundaries conference. He supports Frans Timmermans with developing The Green Deal.

The Green Deal is a plan to make the EU's economy sustainable. This can be done by turning climate and environmental challenges into opportunities, and making the transition just and inclusive for all.

To experience the project, you can use the Super Circular Estate Virtual Tour all the time! With this virtual tour you can walk through the project area yourself, see all developments and find extra information about the specific parts of this innovative circular project.

We are looking forward to sharing the lessons learned in this project and invite you to the closing conference on 24 March 2021. Super Circular Estate's innovation aim is to revolutionize the policymakers, housing associations and estate owners towards more sustainable, resource-efficient decision making, delivery models and processes.

Can't wait?
